# About the Company

## Asseco Solutions

We have been creating **ERP** systems for you since **1990**. **Asseco Solutions** is a pioneer and visionary in the field of ERP information systems. With our existing and potential clients, we have been conducting a partnership dialogue that has lasted more than **30 years**.

We therefore have a constant overview of current market trends, individual needs of companies and the demands of the industries in which they operate. Our customers can always be sure that they are using state-of-the-art technologies in the field of business software.

“We are proud to be part of a global IT group that combines a strong background with excellent market and product expertise. We bet on long-term success, both from the point of view of the group and Asseco Solutions. We offer our customers a long-term partnership that is stable in all respects and goes hand in hand with the extensive and ongoing development of ERP solutions.”

Our Company not only deals with development, but also with implementation and support of specialised **HELIOS** systems for organisations of all sizes in various areas of their operation. Our product portfolio ranges from information systems for the most diverse companies involved in production, trade or services and products for public administration, to products covering the specialised needs of enterprises.

All products are complemented by a wide range of services and partner solutions. In addition to basic modules and functionalities, we also provide applications for individual areas of business known as “branch solutions”. Our Company meets the requirements of the ISO 9001:2015 standard and annually receives recognised awards, such as IT product of the year. **Asseco Solutions** is one of many members of the successful multinational ICT group  
– **Asseco Group**.

## Ing. Jiří Hub

Executive Director and Chairman  
of the Board of Asseco Solutions

# Asseco Solutions

## Company mission

We bring companies long-term peace of mind and inspire them for development. Together with our partners, we turn work into fun through application clouds across Europe.

“We believe that the role of people in business is irreplaceable. We also believe that when a person uses cutting-edge applications and technologies in business, it will allow them to expand, giving them more opportunities, development and growth, and much fewer worries and errors at the same time. We simply believe that our technology moves people forward.”

# What is our **success** based on?

Asseco Solutions is a producer of HELIOS business information systems, and celebrated its 30th anniversary in 2020. The Company's software solutions are also distributed in other Central European markets. We not only deal with development, but also with implementation and support of specialised systems for organisations of all sizes in their various areas of operation.

Our product portfolio ranges from information systems for a diverse field of companies involved in production and trade or services, to products for public administration.

"We are building a world where managing a business is not complicated. We can support enterprises of all sizes across various fields. Because where any kind of processes exist, our role is irreplaceable. We help people discover and develop potential on their way to achieving their visions and goals."

The background of the page is a photograph of an office interior, showing a ceiling with square acoustic tiles and a computer monitor on the right side. A large, white, abstract graphic shape is overlaid on the left and center of the image, framing the text.

# How we work

The result of our efforts to meet our customers' needs are industry solutions for large and medium-sized enterprises that deal with production, trade or services. More than 15,000 customers currently rely on our modern, specialised **ERP solutions**.

Because we speak their language. We are an ideal partner who finds potential for optimisation, for improvement of important processes and acceleration of the long-term growth of businesses. Always reliable and willing to solve your problems, for the safety of your investment. As a part of the **Asseco Group** with more than **32,000 employees**, we are the bearers of future technologies in one of the most innovative and fastest growing software companies in Europe. A medium-sized traditional company with the background of the sixth largest provider of IT solutions in Europe.

“Our HELIOS systems uncover all opportunities and chances, and strengthens entire companies, making them better and more efficient. As a result, they have been able to achieve long-term goals in the future.”

## Our approach

As we have a constant dialogue with our current and potential customers, we have an overview of current market trends. This allows us to meet the needs of individual companies doing business in various industries, and to thereby help them continuously develop.

# The following values drive **our activities**

## **Trust**

Trust is vital to any relationship – we trust our colleagues as well as our customers. That is why we depend on values such as reliability and mutual openness.

## **Team spirit**

In our team, we trust each other, cooperate and achieve success hand in hand. The same applies to our customers and partners – we can only develop by working together.

## **Respect**

We treat others with respect, creating partnerships and collaborations where every individual's contribution is valued.

## **Innovations**

A productive work environment is the basis for creativity – new ideas and perspectives are the foundations of your success.

## **Humanity**

Humanity allows us to strengthen cohesion. Characteristics such as empathy, fair play and willingness to help each other are among our top priorities.

# Key points

# Key points in history

1998 Nagano  
Ice hockey

The origin of **LCS** as a small “garage start-up”. Four owners and the first employee.

A new product is launched on the market – the Noris information system (predecessor of the current system **HELIOS Green**). The Company moves to its own premises in Prague 2.

Beginning of Company management with approximately **60 employees**.

The Company reaches **200** employees and we begin thinking about incorporation into a group of companies and expansion abroad.

1990 –

1995 –

1997 –

2004 –

1991 –

Under the **HELIOS** brand, the first product of **LCS**, a standardised economic system at the time, is launched on the market.

1996 –

Change of Company status from a limited liability company to a joint-stock company.

2000 –

Acquisition of the **Softprofes** company and establishment of branches in Hradec Králové, Brno and Bratislava, then later in Germany.

**2006 Turin**  
Kateřina Neumannová,  
cross-country skiing

LCS acquires a strategic partner, the **ASSECO** Group, which buys a **55%** share in the Company.

**2007** —

Transition of the public administration systems **Fenix** and **eObec**, until now part of the product portfolio of the mother company **Asseco Czech Republic**, into **Asseco Solutions**.

**2010** —

New version of the **HELIOS Green system** and launch of a new product – **HELIOS One**.

**2014** —
